Work Experience

Frontend Web Developer | Oktober 2019 - Present Telkom Indonesia

Worked on a wide range of projects, from building internal dashboards to creating landing pages designed to boost user engagement. Most notably, played a key role in developing a platform where users can easily explore and purchase courses.

- Ensured code quality according to company standards by conducting code reviews, writing comprehensive unit tests, and implementing appropriate tooling to streamline the development process.
- Led a team of six frontend developers, providing mentorship, technical guidance, to ensure both individual growth and successful project delivery.
- Integrated a headless CMS seamlessly into the product's blogging site, enhancing content management capabilities and improving the time of content delivery.
- Developed & maintain an internal user interface library based on the product design system, ensuring consistent styling and functionality across projects while boosting development efficiency.
- Collaborated with the product and marketing teams to implement Google Analytics, driving data-informed decisions and helping optimize strategies to improve product performance.

Software Engineer (Fullstack) | March 2018 - June 2019 Quantus Telematika Indonesia

Developed multiple features including :

- Realtime collaborative document/form creation using websocket
- Video & audio communication using webrtc

Skills

HTML, CSS, javascript, typescript, react.js, next.js, vue.js, nodejs
